Suggestions for Users of Report

This report is the first to be published on the basis of the new Export Commodity Classification. The following information is intended to assist users in locating in this report the commodities of greatest interest to them.

Each subscriber to this report received in March a copy of a working document entitled "Export Commodity Classification in effect January 1, 1961". The Export Commodity Classification contains a summary of the new plan of classification, the full description of each statistical class together with a cross-reference to the old Statistical Classification - Exports, and a detailed commodity index. The new classification should be used in conjunction with all 1961 export reports. The index in the classification will facilitate the location of classes of interest to each user and the classification itself gives the full description of each of the commodity classes. All users should be aware that class descriptions as given in this report are thirty letter summaries of the full descriptions of the statistical classes, and the full descriptions are printed only in the classification.

Many classes in the new classification are referred to in notes on the right hand pages of the Export Commodity Classification. These notes are intended primarily for the guidance of the staff of the External Trade Section, and point up certain coding difficulties encountered during the period when the new classification was being tested. However, some users of the classification may find these notes helpful as an indication of the content of new statistical classes.

Most of the larger classes of the old Statistical Classification - Exports continue essentially unchanged in the new Export Commodity Classification, although under different numbers. Most of the small classes of the former classification have been replaced by new classes designed to give a better picture of the main components of Canada's export trade.

In comparing January export statistics with those for previous periods, careful note should be taken of the relationship between new and old classifications as shown in the new Export Commodity Classification. For example, new class 61-67 "Ontario winter wheat except seed" is identical with class 425 of the old classification. On the other hand, new class 62-65 "Durum semolina and flour" is made up of parts of former classes 500 and 800, and therefore cannot be compared directly with any figure appearing in earlier reports.

The relationship between the classes of the new and old classification is not completely shown in the Export Commodity Classification. It is hoped that about mid-year a more complete index of the relationship between old and new classifications will be available in booklet form. When completed, this index will be made available to all regular users of trade reports.

Changes in Export Commodity Classification

Several revisions to the new Export Commodity Classification have been made in the course of work on statistics for January. These revisions have been carried back to the beginning of the month, and are reflected in statistics contained in this report. They should be entered in your copy of the Export Commodity Classification to keep it up-to-date.

- Page 22, classes 15-19, 15-25, 15-99
change unit of quantity to "Lb." from "Cwt.".
- Page 30, class 42-07
add to description "n.e.s.".
- Page 51, note 152-39
revise to read: "Includes ground screenings
Excludes pelleted screenings (157-09)".
- Page 68, insert additional class
"252-29 Aluminum ores and concentrates Cwt."
class 252-49
revise description of class to read "Aluminum scrap".
- Page 75, note 279-70
change class reference at end of note to "146-99" from "146-55".
- Page 119, note 500-45
change class reference after "main automobile insert bearings" to
"580-85" from "580-99".
- Page 129, note 580-31, line 2
change "capacity of 1 ton or less".
to "capacity of $\frac{1}{2}$ ton or less".

Dominion Bureau of Statistics - External Trade Section, Ottawa, Canada.

COUNTRY CLASSIFICATION CHANGES EFFECTIVE JANUARY 1, 1961

<u>Code</u>	<u>Country</u>	<u>Inclusions and Exclusions</u>
323	Qatar	Until Jan.1, 1960, trade with Qatar was included with Saudi Arabia. From Jan.1 to Dec.31, 1960, trade with Qatar was included with British Middle East n.e.s. Comparative statistics for 1960 published in 1961 reports will be adjusted to show Qatar separately.
329	British Middle East n.e.s. .	Includes trade with Aden (classified separately until Jan.1, 1960), and the Trucial States (included with Saudi Arabia until Jan.1, 1960). From Jan.1, 1961, excludes trade with former British Somaliland (now included with Somalia) and Qatar.
344	Ethiopia	
374	Somalia	From Jan.1, 1961, includes trade with former British Somaliland (formerly included in British Middle East n.e.s.).
377	Sudan	
449	Congo	Includes trade with Ruanda-Urundi.

VALUE, PRICE AND VOLUME INDEXES at end of report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report with additional amendments of coverage in the January, 1961 report.

Value, Price and Volume Indexes of Domestic Exports

The value, price and volume indexes of domestic exports based on the nine main component material groups according to the old Statistical Classification - Exports are still carried in this report and will continue to be published throughout the current year for the convenience of the users of these data.

This report also marks the start of publication of the value, price and volume indexes of domestic exports arranged according to the sections of the new Export Commodity Classification. The first six sections of this classification are represented in the index, and Section VII "Special Transactions Non-Trade", which does not enter into the export totals, is excluded. The declared value indexes have been based on a grouping of 1948 values into appropriate sections of the new classification. The price index has been based on a re-arrangement of the individual price lines used in calculating the old index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is, as usual, derived by dividing the value index by the corresponding price index. No price or volume index is compiled for Section VI "Special Transactions - Trade" because of its non-homogeneity and some inconsistency in average in recent years. In addition to presenting the January 1961 data, the re-arranged indexes have been also prepared for 1960. It is hoped that the corresponding 1959 figures will be published in the Trade of Canada - Exports reports at some later date this year.

Cumulative Totals adjusted in February Report

DOMESTIC EXPORTS

1961
Export
List No. 2

January, 1961

Class Number				
61-69 - Deduct from United States	640 bu.		\$	960
61-62 - Add to United States	640 bu.		\$	960

Note: Effective February 1, 1961 a new export class was established:
231-24 "Logs, poplar, aspen and cottonwood M.B. Ft." (formerly part of class 231-29).
Statistics have been adjusted for this change retroactive to January 1, 1961 as follows: -

January, 1961

Class Number	M.B. Ft.	\$
231-24		
1 - United Kingdom	1,431	152,539
64 - Ireland	109	10,661
422 - Rhod. and Nyas.	26	2,686
427 - Union of So. Afr.	144	14,996
559 - Japan	26	712
	1,736	181,594

Class Number	M.B. Ft.	\$
231 - 29		
55 - Germany W.	47	18,659
73 - Netherlands	4	1,870
990 - United States	105	5,726
	156	26,255

SUMMARY TABLES:	
Domestic Exports by Countries	4
Re-Exports by Areas	6
Domestic Exports by Main Groups of the Statistical Classification— Exports (old classification)	7
Domestic Exports by Sections of the Export Commodity Classifica- tion (new classification)	8

DETAILED TABLES:

Domestic Exports by Commodities and Countries:

	Class Number
Live Animals	1-19 to 9-99
Food, Feed, Beverages and Tobacco	11-09 to 183-99
Crude Materials, Inedible	201-10 to 291-99
Fabricated Materials, Inedible	300-12 to 490-99
End Products, Inedible	500-19 to 960-99
Special Transactions—Trade	970-10 to 970-75
Special Transactions—Non-Trade	990-05 to 995-89
Re-Exports by Commodities	1-19 to 995-89

VALUE, PRICE AND VOLUME INDEXES at end of report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report with additional amendments of coverage in the January, 1961 report.

Value, Price and Volume Indexes of Domestic Exports

The value, price and volume indexes of domestic exports based on the nine main component material groups according to the old Statistical Classification – Exports are still carried in this report and will continue to be published throughout the current year for the convenience of the users of these data.

This report also marks the start of publication of the value, price and volume indexes of domestic exports arranged according to the sections of the new Export Commodity Classification. The first six sections of this classification are represented in the index, and Section VII "Special Transactions Non-Trade", which does not enter into the export totals, is excluded. The declared value indexes have been based on a grouping of 1948 values into appropriate sections of the new classification. The price index has been based on a re-arrangement of the individual price lines used in calculating the old index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is, as usual, derived by dividing the value index by the corresponding price index. No price or volume index is compiled for Section VI "Special Transactions – Trade" because of its non-homogeneity and some inconsistency in coverage in recent years. In addition to presenting the January 1961 data, the re-arranged indexes have been also prepared for 1960. It is hoped that the corresponding 1959 figures will be published in the Trade of Canada – Exports reports at some later date this year.

Cumulative Totals adjusted in March Report

MESTIC EXPORTS

1961
Export
List No. 3

te: The following changes in the Export Commodity Classification will be effective retroactive to January 1, 1961:

Class 254-19 is cancelled and replaced by the following new class:
254-10 Lead in ores and concentrates Cwt.

Class 254-30 is cancelled and replaced by the following new class:
254-39 Lead and lead alloy scrap, dross, skimmings and sludge Cwt.

Class 257-19 is cancelled and replaced by the following new class:
257-10 Zinc in ores and concentrates Cwt.

Class 257-30 is cancelled and replaced by the following new class:
257-39 Zinc and zinc alloy scrap, dross and ashes Cwt.

Class 457-29 is cancelled and replaced by the following new class:
457-08 Zinc blocks, pigs and slabs Cwt.

The balance of cancelled class 457-29 (anodes, bars, rods, plates, strips and sheets) will be coded to class 457-49.

The reading of class 570-29 is changed to the following: Locomotives and tenders; locomotive engines and engine parts.

Locomotive parts other than engine parts which were formerly coded to class 570-29 will now be coded to class 570-99.

Statistics for January and February have been adjusted on the new basis as follows:

	<u>January, 1961</u>		<u>February, 1961</u>

SUMMARY TABLES:	
Domestic Exports by Countries	4
Re-Exports by Areas	6
Domestic Exports by Main Groups of the Statistical Classification— Exports (old classification)	7
Domestic Exports by Sections of the Export Commodity Classifica- tion (new classification)	8

DETAILED TABLES:

Domestic Exports by Commodities and Countries:

	Class Number
Live Animals	1-19 to 9-99
Food, Feed, Beverages and Tobacco	11-09 to 183-99
Crude Materials, Inedible	201-10 to 291-99
Fabricated Materials, Inedible	300-12 to 490-99
End Products, Inedible	500-19 to 960-99
Special Transactions—Trade	970-10 to 970-75
Special Transactions—Non-Trade	990-05 to 995-89
Re-Exports by Commodities	1-19 to 995-89

VALUE, PRICE AND VOLUME INDEXES at end of report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report with additional amendments of coverage in the January, 1961 report.

Value, Price and Volume Indexes of Domestic Exports

The value, price and volume indexes of domestic exports based on the nine main component material groups according to the old Statistical Classification - Exports are still carried in this report and will continue to be published throughout the current year for the convenience of the users of these data.

This report also marks the start of publication of the value, price and volume indexes of domestic exports arranged according to the sections of the new Export Commodity Classification. The first six sections of this classification are represented in the index, and Section VII "Special Transactions Non-Trade", which does not enter into the export totals, is excluded. The declared value indexes have been based on a grouping of 1948 values into appropriate sections of the new classification. The price index has been based on a re-arrangement of the individual price lines used in calculating the old index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is, as usual, derived by dividing the value index by the corresponding price index. No price or volume index is compiled for Section VI "Special Transactions - Trade" because of its non-homogeneity and some inconsistency in coverage in recent years. In addition to presenting the January 1961 data, the re-arranged indexes have been also prepared for 1960. It is hoped that the corresponding 1959 figures will be published in the Trade of Canada - Exports reports at some later date this year.

SUMMARY TABLES:	
Domestic Exports by Countries	4
Re-Exports by Areas	6
Domestic Exports by Main Groups of the Statistical Classification — Exports (old classification)	7
Domestic Exports by Sections of the Export Commodity Classification (new classification)	8

DETAILED TABLES:

Domestic Exports by Commodities and Countries:

	Class Number
Live Animals	1-19 to 9-99
Food, Feed, Beverages and Tobacco	11-09 to 183-99
Crude Materials, Inedible	201-10 to 291-99
Fabricated Materials, Inedible	300-12 to 490-99
End Products, Inedible	500-19 to 960-99
Special Transactions — Trade	970-10 to 970-75
Special Transactions — Non-Trade	990-05 to 995-89
Re-Exports by Commodities	1-19 to 995-89

VALUE, PRICE AND VOLUME INDEXES at end of report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt," 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report with additional amendments of coverage in the January, 1961 report.

Value, Price and Volume Indexes of Domestic Exports

The value, price and volume indexes of domestic exports based on the nine main component material groups according to the old Statistical Classification — Exports are still carried in this report and will continue to be published throughout the current year for the convenience of the users of these data.

This report also marks the start of publication of the value, price and volume indexes of domestic exports arranged according to the sections of the new Export Commodity Classification. The first six sections of this classification are represented in the index, and Section VII "Special Transactions Non-Trade", which does not enter into the export totals, is excluded. The declared value indexes have been based on a grouping of 1948 values into appropriate sections of the new classification. The price index has been based on a re-arrangement of the individual price lines used in calculating the old index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is, as usual, derived by dividing the value index by the corresponding price index. No price or volume index is compiled for Section VI "Special Transactions — Trade" because of its non-homogeneity and some inconsistency in coverage in recent years. In addition to presenting the January 1961 data, the re-arranged indexes have been also prepared for 1960. It is hoped that the corresponding 1959 figures will be published in the Trade of Canada — Exports reports at some later date this year.

DETAILED TABLES:

Domestic Exports by Commodities and Countries:

	Class Number
Live Animals	1-19 to 9-99
Food, Feed, Beverages and Tobacco	11-09 to 183-99
Crude Materials, Inedible	201-10 to 291-99
Fabricated Materials, Inedible	300-12 to 490-99
End Products, Inedible	500-19 to 960-99
Special Transactions — Trade	970-10 to 970-75
Special Transactions — Non-Trade	990-05 to 995-89
Re-Exports by Commodities	1-19 to 995-89

VALUE, PRICE AND VOLUME INDEXES at end of report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.
4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the blue pages of the January, 1960 report with additional amendments of coverage in the January, 1961 report.

Value, Price and Volume Indexes of Domestic Exports

The value, price and volume indexes of domestic exports based on the nine main component material groups according to the old Statistical Classification — Exports are still carried in this report and will continue to be published throughout the current year for the convenience of the users of these data.

This report also marks the start of publication of the value, price and volume indexes of domestic exports arranged according to the sections of the new Export Commodity Classification. The first six sections of this classification are represented in the index, and Section VII "Special Transactions Non-Trade", which does not enter into the export totals, is excluded. The declared value indexes have been based on a grouping of 1948 values into appropriate sections of the new classification. The price index has been based on a re-arrangement of the individual price lines used in calculating the old index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is, as usual, derived by dividing the value index by the corresponding price index. No price or volume index is compiled for Section VI "Special Transactions — Trade" because of its non-homogeneity and some inconsistency in coverage in recent years. In addition to presenting the January 1961 data, the re-arranged indexes have been also prepared for 1960. It is hoped that the corresponding 1959 figures will be published in the Trade of Canada — Exports reports at some later date this year.
